MYOB

MYOB EXO – Point of Sale Module

MYOB EXO Point of Sale combines powerful retail features with an integrated financial application to provide a total business solution. MYOB EXO POS provides the functionality required for retail businesses to effectively manage the whole of their business operation including retail POS.

MYOB EXO Point of Sale is an additional module that can be purchased that integrates with MYOB EXO Finance. If interested in this module, we will place you in touch with an MYOB Enterprise partner to further assist in determining your needs.

Integration

The MYOB EXO POS module provides specific retail functionality that is fully integrated with MYOB EXO Finance. This means that your inventory and debtor management systems will always be live and fully up to date. Your team will therefore be confident with the accuracy of information presented to them from point of sale.

Intuitive user interface

Every retail environment is different, that's why MYOB EXO POS supports a wide range of user interface options. Eliminate the need for a mouse by enabling the function key menu system. Navigate using a standard Windows look and feel with keyboard and or mouse. Support for barcode scanners, electronic cash drawers and docket printers come standard.

Shift management

Enhanced POS enables transaction parking, shift control & reporting, full transaction log by shift, banking batches and running sales total balance. Shifts and banking can be run in unison or separately. Ideal for high cash environments where till clearing and banking is required during a shift.

Multi store/branch support

Within MYOB EXO POS you have the ability to interact with your other stores directly through the POS system. With update access to the stock levels of all other stores you can then complete a transfer to move stock between locations. You can also capture a transaction at one store & retrieve it in a second store if the need arises. With the correct security levels you can review transactions across all branches or lock down a branch to only see their transactions.

Parking transactions

You need to capture a transaction and then park it for later, all a simple keystroke in MYOB EXO POS. If your business has a delayed transaction process, you can simply pull up the transaction, modify it if necessary and complete it with the customer in an easy and simply workflow.

Scheduled price changes

Manage promotions or storewide price changes with ease. Pre-load new pricing and schedule both start and stop dates if needed, then at the appropriate time MYOB EXO POS will automatically update with the new prices. You can then to print your new barcode or shelf labels.

Deferred delivery

For any business that sells large items that require delivery for the customer this is a must. The ability to process the transaction & take payment with the customer in store, while ensuring the system tracks delivery information for getting the goods to the customer at a later date. POS allows you to determine at time of sale whether the customer pays now or pays later, takes goods or requires delivery later.

Handles refunds, credits & account receipts

MYOB EXO POS handles all the necessary transaction types including trade accounts with special pricing, credits and refunds, as well as deposits, lay-by's & general account processing for trade account customers.

Lay-by management

MYOB EXO POS allows you to capture a sale transaction as a lay-by. On entering a lay-by the system will prompt the user to take a deposit based on a system set percentage. The lay-by can then be reviewed at any point in time to determine outstanding balance & history of the deposits taken to date. Once the outstanding balance has been paid the lay-by can then be processed and the goods can be given to the customer.

EFTPOS integration

MYOB EXO POS interfaces with the software provided by the main EFTPOS suppliers. This means your POS is continually upgraded each time your EFTPOS supplier upgrades. Support for upgrading to smart cards or chip-based payment cards in the future is already built into POS.

Security

MYOB EXO POS provides a password-based logon and allows you to customise workflow and workstation settings for complete control over management authorities. Security of the shift and each transactions are supported with barcode or electronic logon. This is ideal for high transaction environments or where the operator is often away from the till.

Audit log

MYOB EXO POS gives you the ability to track what functions have been access, who did what transactions, and where applicable the user can be forced to input a reason why they are carrying out a system activity.

Advanced functions

Because MYOB EXO's POS can integrated to MYOB EXO Finance you get all the benefits of the powerful back end business Management system. If you need further details around your sale you can capture information through extra fields or capture delivery details & due dates. Or you can go one step further with the POS custom function which allows you to add your own custom functions, reports or programs directly from the main POS interface.
